# What To Do If Your Information Is Compromised

---

# Fraud Alert vs. Credit Freeze

## What is a Fraud Alert?

A fraud alert notifies business to go through extra steps to verify your identity before it issues credit, so it may try to contact you.

## How to set up a Fraud Alert

Contact each of the credit bureaus to have them place an alert on your account; the alert lasts one year.

## What is a Credit Freeze?

A credit freeze restricts access to your credit report, which in turn makes it more difficult for identity thieves to open new accounts in your name.

## How to set up a Credit Freeze

To place a credit freeze on your account you need to contact each of the credit bureaus and set up a PIN. A credit freeze will last until you ask for it to be lifted.

# Managing Your Credit Score

---

# What is a **Credit Score**?

Credit Scores are the measure of your consumer credit risk for lenders.

## Independently Managed

Scores are independently managed outside of credit bureaus. FICO Score and VantageScore.

<b>Excellent</b>	<b>720 +</b>
<b>Above Average</b>	<b>650 - 749</b>
<b>Fair</b>	<b>620 - 680</b>
<b>Poor</b>	<b>619 -</b>

## Range of Scores

Most common range of scores is 300-850.

# FICO Score

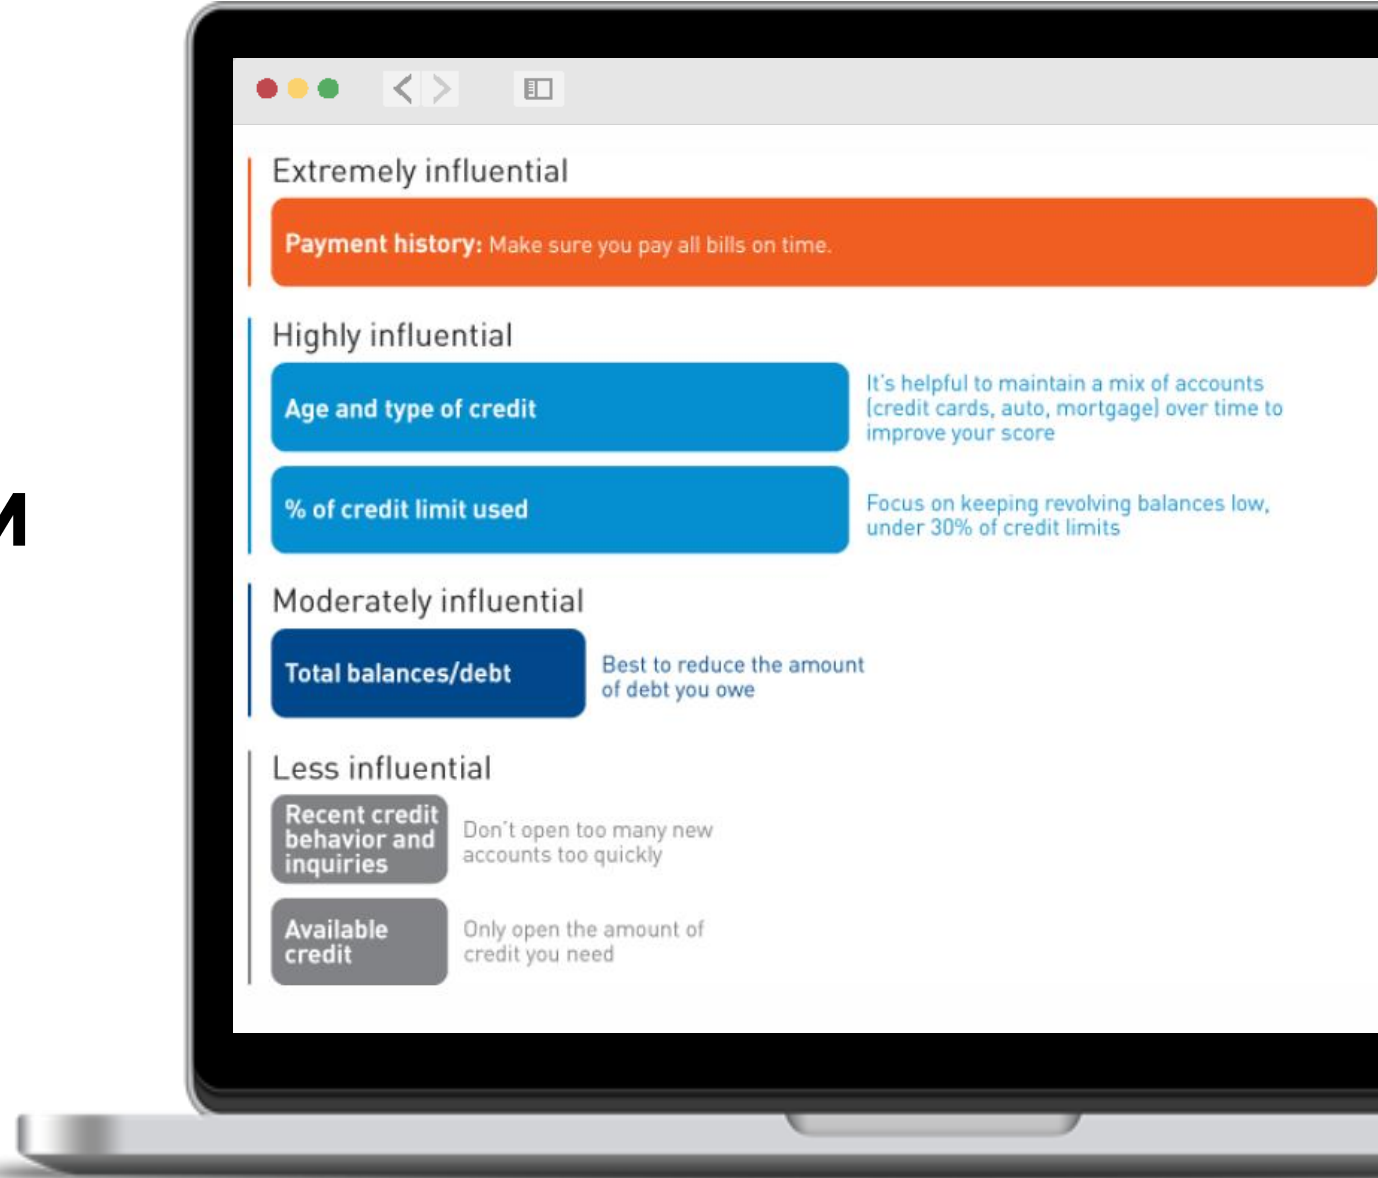

These percentages are based on the importance of the five categories for the general population. For particular groups—for example, people who have not been using credit long—the relative importance of these categories may be different.

# Vantage Score

VantageScore is another credit scoring entity.
